

WALMART FRONTLINE AI TRANSFORMATION

Individual Contribution Statement

ALY-6130 | Group 9 | Northeastern University | Vancouver Campus | June 25th 2026

Isaac Oboikinome Ideho

Primary Contributions

The following table documents my specific and primary contributions to the Walmart Frontline AI Transformation ERM project across all modules of ALY 6130. Each contribution reflects my individual area of responsibility within the team.

Module	Deliverable	Specific Contribution
M1	SWOT Analysis Template	Led the development of the SWOT analysis using the professor-provided landscape template, authoring all four quadrants with three examples each. Each entry included contributing factors, controls, and KRIs explicitly mapped to People, Processes, Technology, Facilities, and Other dimensions. Explicitly labeled Threat 2 as Technical Risk and Threat 3 as Information Security Risk as required by the assignment instructions.
M4	I&W Analysis Two Page Report	Authored the complete two page quantitative risk assessment summary applying the Indicators and Warning analysis technique to all three primary competitive risks (R1, R2, R3). Documented the four step I&W methodology, probability estimation justification for all eight risks, Expected Loss calculations using $EL = P \times I$, and the integrated situation assessment connecting business and non-business environmental factors to enterprise risk exposure.
M4	Risk Register Quantitative Update	Updated the M4 Risk Register with all quantitative assessment columns for all 18 consolidated risks including probability (0-1 scale), expected loss/gain in USD, Monte Carlo P10/Mean/P90, ML warning probability percentage, and I&W traffic light status. Also managed the consolidation of 30 risks from Module 3 to 18 risks through 8 documented merges.
M6	KRI Framework Section 6	Developed the complete KRI framework for Section 6 of the Signature Assessment, including the four-step COSO KRI development process with CRISP-DM methodology documentation, all eight KRI definitions with Green/Amber/Red thresholds and trigger actions, the additional Regulatory Compliance Gap Score KRI (Section 6.3), and the KRI monitoring and escalation protocol (Section 6.4).
M6	Signature Assessment Sections 1, 2, 4, 7.1, 7.2	Authored the Background with Company Summary (Section 1.1), Integrated Situation Assessment (Section 2.2), full Quantitative Risk Assessment (Section 4 covering statistical probability estimation, Expected Loss modeling, Monte Carlo simulation, ML risk prediction, and I&W analysis), and Future Risks for Walmart (Section 7.1) and Future Risks for the Retail Industry (Section 7.2).

Shared Team Contributions

In addition to the primary contributions documented above, I participated equally with all team members in the following collaborative activities:

- Weekly team discussions and structured brainstorming sessions that informed risk identification, scoring, and response strategy decisions across all modules.
- Peer review of all deliverables before submission, providing feedback on content accuracy, APA citation format, and professional language standards.
- GitHub repository management, reviewing and approving pull requests, contributing to the collaborative version control workflow throughout the course.
- Joint review and editing of the final Signature Assessment report to ensure consistency, accuracy, and alignment across all sections.
