

WALMART FRONTLINE AI TRANSFORMATION

Individual Contribution Statement

ALY-6130 | Group 9 | Northeastern University | Vancouver Campus | June 25th 2026

Blessing Idowu Jonathan

Primary Contributions

The following table documents my specific and primary contributions to the Walmart Frontline AI Transformation ERM project across all modules of ALY 6130. Each contribution reflects my individual area of responsibility within the team.

Module	Deliverable	Specific Contribution
M2	Risk Register Risk Statements	Led the development of all three competitive risk statements in the required format (The risk of... caused by... resulting in...), including R-001 (Market Share Erosion from Competitive AI Disruption), R-002 (Customer Migration Risk and Trust Erosion), and R-003 (AI Supply Chain Optimization Opportunity). Ensured each statement clearly identified the threat, its cause, and its resulting consequences.
M2	Problem Statement Sheet	Authored the Problem Statement worksheet for all three competitive risks, documenting the specific competitive pressure, SWOT source linkage, and urgency justification for why each risk required immediate monitoring. Ensured all statements referenced specific competitive intelligence data from Amazon and Target.
M5	Risk Response Strategy Framework	Developed the complete risk response strategy framework for all eight identified risks, selecting and justifying the appropriate response strategy (Avoid, Mitigate, Transfer, Accept, or Exploit) for each risk based on its nature, quantitative score, and alignment with Walmart's risk appetite. Documented detailed mitigation action plans with owners and success metrics.
M6	Signature Assessment Sections 5 and 7.3	Authored the Risk Response Strategy section (Section 5) of the final Signature Assessment report, documenting detailed response plans for R1, R3, R5, and R6. Also authored the Other Actions Required section (Section 7.3) documenting six supplementary mitigation actions including the AI Risk Governance Committee, third-party audits, Business Continuity Plan, and Vendor Risk Management Program.
M6	GitHub Repository Management	Managed pull request approvals and merges across all team members' branches throughout the course, ensuring all assignment files were correctly organized and submitted to the main branch through the required two-reviewer PR approval process. Approved PRs for Modules 2, 3, and 4 submissions.

Shared Team Contributions

In addition to the primary contributions documented above, I participated equally with all team members in the following collaborative activities:

- Weekly team discussions and structured brainstorming sessions that informed risk identification, scoring, and response strategy decisions across all modules.
- Peer review of all deliverables before submission, providing feedback on content accuracy, APA citation format, and professional language standards.
- GitHub repository management reviewing and approving pull requests, contributing to the collaborative version control workflow throughout the course.
- Joint review and editing of the final Signature Assessment report to ensure consistency, accuracy, and alignment across all sections.
